To the Campus Community:

As you may have seen in the President's update, we are ramping up the pace on initial projects for phase one of Measure H. As part of the initial capital plan, several buildings are proposed.

These structures include new instructional buildings, a veteran's center, development of a regional public safety training ground, and a student services building at the Tehama campus. These new buildings represent the primary components of the initial phase for our bond projects. Once these are built, space will be freed up for use as swing space. This will allow us to relocate folks as we remodel older buildings. Other smaller projects will happen as well.

Major New Buildings

1000 Building (Instructional)

Primary users of this building will likely be ACSS and SLAM. We are interested in vacating current services that exist in the 1100 (Math) building to this new building. There is an interest in moving the learning centers function from the 700 building back closer to the instructional areas they serve. With that in mind, the 1100 building would be the top location under consideration for those services once it is vacated.

CTE Instructional Building I

This would be a smaller CTE building filling out the industrial quad adjacent to the welding and automotive buildings.

CTE Instructional Building II

Primary users of this building would be from the BAITS division. In the long term we would like to vacate 2200, 2100 and 1300 so instructional staff in those areas would be under consideration for a move to this building.

Veterans Center (Main Campus)

This would be a dedicated center for our student veterans, allowing the access to a wide variety of student services in a single location with designated support.

Student Service Building (Tehama)

The long term plan has a dedicated footprint for this building. The Tehama team has been working on, and providing input for this building.

As part of this process we are putting together project teams for each building that will include primary users. I have been soliciting input for team members, and have a few folks so far. If you have suggestions for members please let me know.

Additionally, we are having a couple of facility forums to allow folks to provide input, ask questions and share concerns. I am attaching the most recent draft of a future map of the main campus. This will be a primary topic of discussion at the forums.

Please join us at one of the following forums:

September 14 – from 3:00 p.m. - 4:00 p.m.
Location: Board Room (100 building)

September 20th – from 11:00 a.m. -12:00 p.m.
Location: Board Room (100 building)

Thanks
Morris
