**Attachments:** [Master Plan Campus Map - Boring Sites.pdf](#)

---

Good morning, all. MPE Engineering will be on the Shasta College main campus on the dates shown below to obtain boring samples at the following locations shown on the attached map:

- CTE Building and Storage Area – May 10<sup>th</sup> & May 11<sup>th</sup>
- Storage Warehouse – May 11<sup>th</sup>
- Veterans Center – May 12<sup>th</sup>

The borings will be evaluated for liquefaction potential and seismic settlement, and are required by the Division of State Architects and the California Geological Survey. The borings will be 80 feet in depth, and from 4 to 6 inches in diameter. It will be NOISY, so my apologies in advance!

This is exciting, as it is the first visual evidence on the interior of campus of bond projects moving forward. Pictures and/or video of the process will be posted on the Measure H website the week of May 14<sup>th</sup> so you can see what the process entailed.

If you have any questions or concerns, please feel free to contact me.

Enjoy your day!
