

TOP – to – CIP REPORT

Office of Instruction

As part of the statewide transition from Taxonomy of Programs (TOP) codes to Classification of Instructional Programs (CIP) codes, the Office of Instruction reviewed more than 1,000 course and program classifications.

While some TOP codes translated directly to CIP codes, others required updates, or adjustments to CTE and non-CTE designations to ensure consistency between the classification and assigned CIP code. (i.e., if your TOP code is CTE, it is important that the corresponding CIP code is also CTE.)

This report **identifies the courses and programs where a CIP (or TOP) code change is recommended**, and provides the rationale for each adjustment.

CIP codes have historically been used primarily for institutional reporting purposes and have not generally been part of faculty-facing curriculum information. We are sharing this information to allow faculty to review how their courses and programs are represented. **If you have questions or believe another CIP code would be more appropriate, you can use the links below for your own research, or contact the Curriculum Specialists in the Office of Instruction.**
