9. **DISCUSSION/ACTION ITEMS – NEW COURSES**

9.1 **AGEH 351 Composting and Vermiculture** – New noncredit course w/DE, 0 units
Proposed Disciplines: Agricultural Production
Justification: The addition of a Composting and Vermiculture course to the Small Farms Operations Certificate program provides students with essential knowledge and hands-on skills in nutrient cycling, organic waste diversion, and sustainable agricultural production. Composting is a fundamental practice in organic farming that improves soil fertility, enhances soil structure and water-holding capacity, reduces dependence on purchased fertilizers, and supports long-term farm sustainability. The course aligns with California's increasing emphasis on organic waste diversion and sustainability initiatives, including Senate Bill 1383, which has created growing workforce demand for individuals trained in composting and resource recovery practices. Additionally, students will have opportunities to participate in campus composting and vermiculture projects that divert green waste and food waste from landfills while producing valuable soil amendments for instructional gardens and farm operations.

10. **DISCUSSION/ACTION ITEMS – COURSE DEACTIVATIONS**

10.1 **AG 58 Student Enterprise Projects**
Last run: Fall 2024
Justification: This course is not associated with a program or degree and there are no plans to offer it in the next couple of years.
Proposal Impacts:

- None

10.2 **ALH 102 Administrative Medical Assisting**
Last run: Spring 2023
Justification: The program was restructured 2 years ago and this course is no longer in use.

Proposal Impacts:

- None
