## Assessment: Program Review Updates prior to Fall 2018

# Program (CIS) - Computer and Information Systems: Systems Management AS. 1157 

## Program Catalog Summary:

## Associate in Science:

SC Program: AS. 1157

PROGRAM DESCRIPTION: This degree combines the core business courses with courses in the Information Technolog (IT) skills area. It prepares you to enter the workforce in an entry level IT related position with many public and private organizations, or to start your own IT related business. The degree also prepares you to transfer to a four-year institution and complete a bachelor's degree in an IT related area.

This degree is approved through the California Community College Chancellor's Office. Upon satisfactory completion of all degree requirements and filing an application for graduation with Admissions and Records, the student's transcript will reflect completion of this degree.

PROGRAM LEARNING OUTCOMES:
Upon successful completion of this degree, the student should be able to:

1. Demonstrate at a fundamental level of knowledge and understanding of business practices including finance, accounting, marketing, management, human relations, e-commerce, legal and ethical considerations.
2. Given a set of requirements design, develop, and debug a computer program that satisfies the requirements.
3. Demonstrate competence using office software including database, spreadsheet, and word processing.
4. Given a set of requirements design and build a web page that meets the requirements.
5. Build and troubleshoot a computer network involving three computers, an ethernet switch, and IP addressing.

DEGREE REQUIREMENTS:

## CORE COURSES:

ART 80A Graphic Design 3
BUAD 10 * Introduction to Business (fulfills GE requirement) 3
BUAD 66 * Business Communications 3
BUAD 71 Introduction to e-Commerce 1
BUAD 72 e-Commerce Marketing 1
BUAD 80 Principles of Customer Service 3
CIS 2 * Introduction to Computer Science 4
CIS 20 Access for Windows 1
CIS 23 Fundamentals of SQL 3
CIS 60 * Visual Basic Programming 3
CIS 62 * Java Programming 3
CIS 64 Web Programming Using JAVA/PHP/FLASH 3
CIS 73 Photoshop 1
CIS 83 Web Design Using Dreamweaver 2
CIS 86 HTML 3
CIS 92 Computer Security 3
OAS 10 Excel for Windows - 11
*May be used to fulfill General Education requirements. See a counselor.

Major 41
Additional General Education 15
General Electives 4
Degree Total 60*
*Note: Calculation assumes a student will double-count the Multicultural graduation requirement with either a social science or humanities G.E. requirement and that the student will fulfill computer literacy through a test. If students plan well and see a counselor, they may be able to double count the Multicultural and Computer Literacy units. If these graduation requirements are added, the number of units is increased by 6 units.

## Fall 2017

Prepared By: Lew Schmitt. Tom Martin, Dhabih Hendershot \& Jeff Hendrickson
What improvements are needed? Please reference items from any associated program reviews as needed.: To improve student outcomes this program needs two additional full-time faculty, one as a replacement for a probable retirement which is supported by our data. The program needs to update hardware to current industry standards, collaborate with local high schools to communicate our updated curriculum and develop guided pathways, develop a student success plan with our new student success coordinator, send CIS faculty for professional development to keep our skills current and develop a marketing plan with EWD. This program operates both night and day classes and needs large blocks of time in computer labs with updated hardware. It is important that we maintain sufficient computer lab classrooms in order to schedule courses when students need them and provide open lab time for our students to get help on their classwork. Currently our CIS students are not supported by any other supervised tutoring lab. Technology is part of many classes and programs beyond our department and student need a place to go for help.
Who completed this form?: Lew Schmitt. Tom Martin, Dhabih Hendershot \& Jeff Hendrickson
Participation in the report: Area Faculty (list in the next box), Advisory Committee (if one exists), Other (such as counselorsoutside area faculty-deans)
Summarize Participation comments: Technology in our labs is trailing behind industry standards
New faculty and para-professional needed
New equipment needed
Recommendation for Discontinuance?: No
Analyze Overall PLO achievement: PLO achievement is very high. over 95\% of students earning the degree have achieved the PLO's. CIS Faculty are currently reviewing the PLO's and developing additional PLO's for this program which will be updated shortly.
What changes could be (or have been) made to improve the program?: CIS faculty along with advisory committee have restructured this certificate to align with current industry standards and to align within a stackable certificate and degree pathway that leads from the high schools and on to four year institutions. Each course has been reviewed and updated as well. Faculty have successfully applied for funding for a partial upgrade to some equipment but additional funding is needed to bring us in line with mandated industry changes and to adequately prepare our student for the workforce.
Resources needed to implement the changes noted above: Two additional faculty with one replacement for a potential retirement
Updated switches and routers, rack mounts, cabling, tools, USB drives, ssd drives, wireless access in the computer labs, dual monitors in the lab, new classroom projectors, NetOp software, Classroom display devices and high end pc's and laptops, classroom color printers with wireless printing, scanners, and other devices that improve our ability to deliver quality education. Professional Development for CIS faculty to update skills and knowledge
Additional computer lab classrooms as it is difficult to schedule courses when students need them and we are already offering sections in the evening.
Open lab with paraprofessional to support CIS students with course work
Labor Market Demand: LMI data shows technology industry jobs are increasing every year across the nation and particularly in California. Local demand is also very strong with many positions remaining open. Our advisory committee reports that they do not bother to list many of their IT related jobs because of the lack of response of qualified workers and rely instead on their social networks to provide references. CIS faculty have referred more than ten students who have been hired this past year at local business. CIS Faculty has also created a Linkedln group for current and former students where new jobs are posted.
Currently we have over 800 members.
Duplication of training: There are no similar programs in the area
Program effectiveness: This program measures its effectiveness by Perkins Core Indicators as reported by the Chancellor's office and college generated data read with Tableau.

Other data indications for program improvement: Our Tableau data shows that our success (77\%) and retention (92\%) rates are higher than the college goals of $70 \%$ and $80 \%$.
Perkins Core Indicators show good success rates as well and also show we need to help students fill out the college paperwork to officially "complete" certificates and degrees which will be addressed in our student success plan.

Replicating community college programs north of Sacramento?: None
CSU and UC Transfer impact analysis:: Few of our students in this program transfer as their goal is employment or promotions. We do keep in contact with CSU Chico and Southern Oregon University where we have developed pathways to four year degrees. Those student who do transfer tend to favor those locations.
Influence on related programs and services: This degree is the final local step in a series of stackable certificates and degrees and can lead the student to a four year institution if they choose.
Specific additional program reflections: Our advisory committee has long indicated that an improvement on student social job skills is needed. We have added team projects and presentations into our courses which has shown to be somewhat effective and are currently developing modules from the 21st Century Job Skills and Growth Mindset curriculum to incorporate into several classes
Other factors for consideration: This program has sections scheduled during the day and night and requires large block of time in computer lab classrooms. As we plan for new buildings it will be important that we maintain a higher number of labs than we currently have to allow for growth and an open tutoring lab focused on technology related courses. Most courses in this program have an online component.
**TO BE COMPLETED BY THE PROGRAM REVIEW COMMITTEE** PRC Action:: PRC recommends the program continue without qualification
Summary Date: 01/30/2019
Summary of findings: Note: The catalog description in Nuventive Improve does not match the last two catalogs. The statistics and information herein are relative to the catalog description prior to 2017/18. Significant changes in courses assigned to this degree have taken place.
The PRC recommends this program continue without qualification. The program has a four-year average of 7.75 completers (2013/14 to 2017/18). The 5-year average success rate for all degree classes is $75.74 \%$, which is above the Institution-set Standard of $70 \%$. Retention rates are very strong with a five-year average of $91.02 \%$ for classes in the degree. Enrollments appear to be well-maintained with a 5 -year average of 20.6 students per section. There has been an increase in enrollments from 289 in year 2012/13 to 368 in year 2016/17 which is a $29.15 \%$ jump. The increase in sections for the same time periods from 72 to 107 is a $48.61 \%$ increase. However, the changes to courses aligned with the degree are so vast that these statistic have little relevance. The PLO's have been mapped to ISLO's, SLO's to PLO's and SLO's to ISLO's for classes in the degree (as it is currently listed in the catalog).
The PRC recognizes the dynamic nature of the CIS program and support their efforts in maintaining a vibrant and relevant curriculum. Commenting on specific changes to core offerings is a feature for future program review reports. We also encourage future program review reports be more differentiated between degrees and certificates and further encourage incorporating or attaching Advisory Committee comments or minutes (e.g. CL. 3441 and AS 1157 have largely the same verbiage).

Summary review date: 02/20/2019
Date summary sent to program faculty and/or counselors: 02/25/2019
Program faculty response: Counselors: Carolyn Borg: I support the recommendation to continue without qualification. The Systems Management program is popular with students.
Probably outside the scope of your committee, but I'd like to see the "CIS program stackable certificates" chart included in the catalog. Dhabih Hendershot has the original, might need an update. Sue Loring also supports.

Faculty member Tom Martin: Thank you Stacy for your comments and suggestions. Please pass on our appreciation to your team.

Date summary sent to College Council: 03/27/2019
Date reviewed by College Council: 04/02/2019
