

**Labeling Guidelines for:**

# HAZARDOUS WASTE

In order to meet Federal, State and County laws and regulations, any container that holds hazardous waste **must** be properly labeled as hazardous waste. To be consistent in content and format, Shasta College will use the standard Hazardous Waste labels which will contain the following information:

- The words, "**HAZARDOUS WASTE**"; [22 CCR §66262.34(f)].
- The waste accumulation start date.
- The physical state and composition of the waste (e.g., liquid pesticide).
- Declaration of any particular toxic or hazardous properties (e.g., flammability, strong oxidizer).
- Name and address of waste-generating facility.

Additionally, containers shall be labeled with the appropriate DOT label identifying the waste hazard class ( see [www.shastacollege.edu/hazmat/DOTLabels](http://www.shastacollege.edu/hazmat/DOTLabels) ).

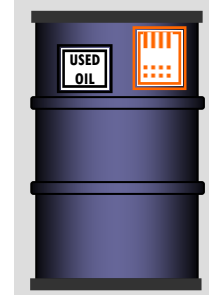

## Specific Hazardous Waste

### Used Oil

In addition to the above requirements, add the words "**USED OIL**" to all containers, tanks and fill pipes used to transfer oil into an underground tank.

**USED OIL**

### Drained Used Oil and Fuel Filters

Containers of used oil and/or diesel filters shall be labeled with the following:

- The words "DRAINED USED OIL FILTERS."
- The initial date of accumulation.

**DRAINED  
USED OIL  
FILTERS**  
Accum. start date
