

Recycling Awareness

By Ryan Barnett

Representative of Sustainability

Recycling bins are located throughout the campus in every by the building and by classroom as well as in numerous outdoor locations,. But even as adults, we as senate members can't even recycle. It was told to me by members of the senate that it was not their job even if they bought the cans or plastic bottles. And some members even said "the job of Representative of Sustainability was to go recycle".

I believe recycling awareness needs to be address and a Committee of recycling awareness needs to happen for more understanding. This topic must be approach with care and diligence cause of the jobs on campus in consideration and information about recycling for the students.

Some information for the senate members there is a recycle bin outside the office just 30ft. front of the student store.
