New students who have completed college orientation and developed educational plans as well as continuing students in good standing who have not exceeded 100 degree-applicable units have priority over students who do not meet the criteria. More information on priority registration can be found in AP 5055. Adult Education: Through its adult education programs, California offers learners a diverse range of knowledge and skills necessary to participate effectively as citizens, workers, parents, and family and community members. Adult education has been an important part of California's education system since the early years of statehood. The California Adult Education Program (CAEP) is a statewide initiative between the California Community College Chancellor's Office (CCCCO) and the California Department of Education (CDE) to implement regional plans for California adult education under AB104. members within the three-county region. All members consist of various K-12 Districts, County Offices of Education, and Shasta College. CAEP funds are used to assist non-credit students in various pathways, leading to educational goals and sustainable employment opportunities.

The Shasta-Tehama-Trinity Adult Education Consortium (STTAEC), using the brand name Better.Jobs, works collaboratively with various community and educational partners to create, expand and streamline educational programming for adults (18+) interested in training in one or more of these areas:

Hire Up Pilot Program The Hire Up Program is tailored to offer financial support to students who were formerly incarcerated, CalWORKs recipients, or former foster youth. The program provides a financial boost for students' college journey through stipends meant to assist with their college-related expenses. The objective is to relieve financial stress during students' college experience, allowing them to concentrate more on their academic pursuits. The stipends are equivalent to an hourly wage and are dependent on the number of units students are currently enrolled in and align with their educational plan.

Community Education: Community Education is a program that is fee-based, not-for-credit, and meant for everyone in our community, regardless of age. The mission is to provide relevant educational experiences that help people achieve their goals. These goals may be to learn or engage in a new activity, personal growth and enrichment, professional development, or learning through trips and travel opportunities.

Business Training Center: The Business Training Center is the branch of Community Education that is dedicated to professional development. We do this through enrollment-based courses, found in our catalog, or by contracting with local businesses and organizations to train a cohort of employees. By partnering with local businesses and industry, the Business Training Center is able to enhance our community's economic growth through cost-effective, results-oriented training services that are relevant and performance-based. It also offers to qualified businesses special funding opportunities for training through the Employment and Training Panel (ETP).

Employer Engagement: Shasta College has expanded its employer engagement efforts to include more than 20 counties. Shasta College employs 8 Directors of Employer Partnership (DEPs) to facilitate these activities. The DEPs work regionally to expand work-based learning opportunities and facilitate job placement for community college students, with a focus on supporting disproportionately impacted (DI) communities. They develop strategic work plans with clear objectives and measurable outcomes to recruit employers for internships, job placements, and work-based learning activities such as tours and classroom engagements. Collaborating with faculty, they integrate these opportunities into academic programs and ensure that students are connected with resources that enhance their career readiness. In addition, the DEPs prioritize job placement by partnering with career centers, faculty, and employers to match upcoming graduates with aligned job openings. They support employers in posting positions on job platforms, oversee case management for graduates, and track employment outcomes. To improve employer responsiveness, they engage in program development, apprenticeship initiatives, and training, while maintaining regular communication to address.

OUTREACH: CTE Outreach actively connects with local communities, high schools, and adult education centers to increase awareness, accessibility, and participation in career and technical education at Shasta College. The program aims to engage and inform prospective students through initiatives like N.E.W. (Non-Traditional Employment for Women), which supports women entering male-dominated fields; CTE Academies, offering a unique, hands-on experience; CTE Preview Day, an event designed to showcase our CTE programs; and ongoing innovative outreach efforts. These efforts collectively foster inclusive access and empower students with the knowledge and opportunities necessary to explore careers in CTE for successful, sustainable careers, while supporting the local workforce and economy.

ACADEMIC FREEDOM POLICY

Reference: Title 5, Section 51023; Accreditation Standard 2.2; BP 4030; approved 4/9/03

Controversial issues and divergent viewpoints have existed among men throughout the history of civilization. Only in a constitutional republic such as ours has a high degree of freedom of expression been permitted. There must be freedom of the student and teacher to present their viewpoints in and out of the classroom. American democracy is strong enough to stand on its own merits and to survive criticism and comparison with any system so long as its advantages and virtues are not deliberately slighted in such comparisons. However, an atmosphere of responsibility to the student, the College, the community and the nation must accompany these freedoms. To carry out their mutual responsibilities to each other and to ensure these principles of academic freedom, the Board of Trustees, the administration and faculty agree to support certain guiding principles and procedures as set forth below.

1. **The faculty member shall:**

a) Be entitled to freedom of expression in teaching his/her subjects in the classroom. He/she shall encourage fair examination of controversial questions. He/she shall encourage students, by word and example, to form their own opinions based upon critical judgment and documented facts. In his/her presentation of subject matter to his/her students, he/she shall distinguish between objective facts and his/her personal evaluation of facts.
b) Be supported in his/her right to participate in legal political activities of the community, state and nation during off-duty hours. No disciplinary action may be brought to coerce him/her for political purposes. (Education Code 13004, 13754). He/she shall permit no outside political activities to interfere with his/her academic duties. He/she should always make clear to audiences that the opinions expressed regarding outside political activities are his/her own and not to be taken as necessarily representing the policies of the College. He/she should refrain from making irresponsible statements to any group.
c) Be ever cognizant that it is illegal to advocate the overthrow of the Government by force (Education Code 9455). He/she should make a clear distinction between the description of such philosophies as might fall in that category and the advocacy of such philosophies.
d) Emphasize the need for maintaining a level of individual integrity and responsibility consistent with good community relations of the College, when associated with student activities that reach beyond the classroom.
e) Provide a fair platform for the presentation of facts when outside speakers are invited to the classroom on the campus.

Such speakers should be free to speak on topics which are relevant to questions being discussed in the classroom or campus situation. It may, at times, be desirable for the faculty members and administration to provide information and viewpoints to rebut opinions expressed by such speakers in order to encourage critical analysis of the questions discussed.

2. Classroom policy regarding the discussion of controversial issues shall be:

a) That free classroom expression by the instructor and the students be encouraged so long as topics are pertinent to the course being taught. The instructor is careful to be accurate, responsible and aware of the immaturity of some of the students in presenting and discussing controversial topics.
b) That the instructor avoids prejudicial indoctrination. He/she points out to students that there may be other recognized views, and he/she carefully distinguishes between personal opinion and documented fact. He/she avoids imposing his/her opinion regarding controversial topics through the pressure of his/her authority in the classroom.
c) That discussion of religious concepts is free from restraint so long as it is an integral part of the subject being taught and does not become sectarian indoctrination.
d) That the teacher respects the student's right to differ in opinion in any discussion of controversial issues, without penalty, attack, or reflection in grading.

FIELD TRIP/EXCURSION WAIVERS

Throughout the semester/school year, the District may sponsor off-campus, extra-curricular field trips/excursions. If you choose to participate, be advised that pursuant to California Code of Regulations Sub-Chapter 5, Section 55220, you have agreed to hold the District, its officers, agents and employees harmless from any and all liability or claims which may arise out of or in connection with your participation in the activity.

PRIVACY RIGHTS OF STUDENTS

The Family Educational Rights and Privacy Act (Section 438, Public Law 93-380) requires educational institutions to provide: access to official education records directly related to the student; an opportunity for a hearing to challenge such records on the grounds that they are inaccurate, misleading, or otherwise inappropriate; that the college must obtain written consent of the student before releasing personally identifiable information about them from records to other than a specified list of persons and agencies; and that these rights extend to present and former students of the college.

1. Education records generally include documents and information related to admission, enrollment in classes, and grades and related information.
2. The Dean of Enrollment Services has been designated “Records Officer”, as required by the Act.
3. Education records will be made available for inspection and review during working hours, by presently and formerly enrolled students, within 45 days following completion and filing of a request form with the Records Officer.
4. A student may challenge the accuracy of his/her educational records and request that the Records Officer make appropriate corrections. If these informal proceedings do not settle the dispute with the student’s records, the student may submit an appeal in writing to the “Designated Officer”, the Vice President of Student Services, on forms provided by the office. The Designated Officer will then assign the matter within 10 school days to a “Hearing Officer,” who is the chair of the Scholastic Standards Committee.
5. During the informal proceedings, the Records Officer may make such adjustments or changes not constituting interference of integrity of professional entries. The Hearing Officer will set a date for the hearing, at the conclusion of which he/she will render a decision to the President of the college who will make the final decision of what action is to be taken.
6. The college may release certain types of “Directory Information”, unless the student submits in writing to the Records Officer that certain or all such information not be released without his/her consent. Directory Information at Shasta College includes:

(1) student name and city of residence; (2) participation in recognized activities and sports; (3) dates of attendance; (4) degrees and awards received; and (5) the most recent previous education agency or institution attended, and height and weight of members of athletic teams which may be released only by the appropriate athletic staff member or the Dean of the area. In addition to the above- stated Directory Information, the college may also report student name, address, telephone number, date of birth, level of education, and major to the federal government, including military recruiting agencies in accordance with Public Law 104-208 and 104-206

(Solomon Amendment). Individuals requesting Directory Information must specify student’s complete name(s) and any other personally identifiable information that will assist the college to identify the student and research the requested information.

7. Student consent is needed for the release of any non-directory information/records covered by the Act to outside parties (for example: prospective employers) except for those agencies entitled to access under the provisions of the Act (for example: campus officials, other schools, federal educational and auditing officials, and requests in connection with the application or receipt of financial aid).
8. Students have the right to refuse to allow the college to designate information as directory information which could be disclosed to outside entities. Materials Fee $1206.50. 1. Prerequisite: Students must have a valid NREMT license. A full list of prerequisites can be obtained by contacting Liz Ault (lault@shastacollege.edu) 2. Prerequisite: FIRS 398 Fire Academy Orientation must be completed prior to the beginning of FIRS 104 (Firefighter Academy). Attendance is mandatory. 3. The California State Fire Marshal's Office requires that all Firefighter I summative tests be completed with a minimum score of 80% (a grade of B or higher). Any student who does not meet this standard will have failed FIRS 104 and will not receive credit for the course, nor will the student receive a course completion certificate. 4. Required Materials: Required materials include items such as student manuals, books, uniforms, personal protective equipment, rope and webbing, certificates, water bottle, etc. To ensure consistency, all required materials, equipment, and uniforms are ordered during orientation. You must have these items in your possession on the first day of class. If you are missing anything, you will be sent home. 5. Enrollment fees: California resident students: $1,036.50 ($46.00 per unit [21.50 units]; and $47.50 Student Services fee). Non-Resident tuition: $7,959.50 ($368 per unit plus $47.50 Student Services fee) 6. Certificate Fees: Approximately $1,206.50. Fees vary according to the certificates being sought. This fee covers certificates from the California State Fire Marshal's Office, Cal-OES, CSTI, or similar agencies that have certification fees attached to their courses. Graduates of the academy will receive additional certificates that do not have fees attached. A complete listing of certificates with or without fees is available from the Fire Technology Office. Payment of certificate fees is due at time of enrollment. 7. Emergency Medical Information Form: An Emergency Medical Information Form must be completed and signed by a licensed physician citing full participation in rigorous training. If a full physical has been completed within the last six months, bring a copy of that physical to the class. 8. Respiratory Medical Evaluation Questionnaire Fee: Approximately $80.00 (subject to change). Students must complete this questionnaire and submit it for review to Agile Occupational Medical Center. This evaluation is mandatory to help determine the student's ability to wear a respirator. In some cases, Agile may recommend an additional physical exam to complete the evaluation. 9. While the Fire Academy meets Monday through Friday, students should anticipate schedule changes based on weather, facilities use, mass illness, instructor availability, etc. This may involve scheduling occasional evening or weekend class meetings. In addition to class hours, students will be expected to complete an extensive amount of homework, meet in study groups and, if needed, come in on their own time to practice technical skills and improve physical conditioning. In short, this is a full time commitment for the semester. 10. Students taking the Fire Academy must have a computer, valid email address and reliable internet access throughout the semester (computers are available on a first-come/first served basis at the college library). Students will need effective computer skills. 11. Fire Academy students must be medically cleared for rigorous physical activity prior to the first day of class. The required medical forms can be picked up in room 6003 M-F, 8:00 a.m. to 4:00 p.m. Students who do not have full medical clearance on the first day of orientation will not be allowed to participate in any Fire Academy activities and will be dropped from the class by the Director. Students should anticipate a very demanding, yet highly rewarding semester while completing this course.
